# INTRO

CrazyFly is a family business and a great team. The office headquarters along with our own production facility are located in Slovakia - Europe, since 1999. Our production is the most precise in every detail and our raw materials used are all from the best European producers in ski and snowboarding industry with about hundred years of experiences. High technology materials such as Carbon, epoxy, ABS, top sheet foils, and special selected wood are all the highest quality materials delivered to our production only from European firms. Also, our accessories are made in European Union, not in Asia. Our goal is not to cut the cost we pay for the materials and accessories used on CrazyFly boards, but to bring the highest quality for all customers. We put a lot of effort into Quality Control to produce the best boards, so we control every step in production. Our molding process developed trough past years became excellent as we use the right mix of high pressure and high temperatures at the right time. CNC cutting and rounding outline is the most precise with no mistakes, and hand wet out lamination, hand finished and polished rails, makes CrazyFly boards as great as they are.

Jozef Bukovčák

The Big Boss. He is the founder and starter of CrazyFly company. Jozef is the only owner, main director, and chef of R&D and production.

Jozef Bukovčák Jr.

Sales and financial manager. He assures your satisfaction when you order CrazyFly products.

Mirka Bukovčáková

Customer services. We need a lady's touch. She is the angel when customers have a little trouble and Mirka is the professional to help you.

Michal Bukovčák

Director of art&designs and technical support. This guy knows it all in terms of electronic graphic designs, web designs, and programming. Just give him a scratch on a piece of paper, and he will do his magic with computer.

Iveta Bukovčáková

Administration. She has to deal with everyday administration work. More or less, Iveta takes care of every job that the Big Boss assigns to her.

Pavol Bukovčák

Graphic designer. He is a crazy young guy and is the style, design, and fashion of these days himself.

# ROCKY CHATWELL TOP 10 (PKRA 2007)

*Rocky Chatwell*

### Competition results PKRA 2007 World Tour:

1. Venezuela 13th + Award for the Most Improved Rider
2. Austria 4th
3. Italy 17th
4. Cabarete 9th
5. Tarifa 17th
6. Fuerteventura 25th
7. Germany 7th
8. Brazil 17th
9. Chile 9th

Final overall standing: 9th

**Congratulations!**  
Rocky finished 2007 PKRA on 9th place!!!

CrazyFly kiteboarding team is proud of its' youngest Team Pro Rider Rocky Chatwell (17), USA. This Texan youth is skyrocketing his way up to stardom in kite boarding. At 14 he began windsurfing around Wildcat Park, Portland Texas. (No harness and wore jeans for jellyfish protection:). Jeff Howard gave him some used kite gear and here we are 3 years later and Rocky is now ranked 10th in the world. Rocky won 1st place pro-men freestyle 2006 Canadian Kitesurf Challenge, got wild card and went on to place 9th PKRA 2006 Canada in Iles de la Madeleine. Later on he won 1st place best trick amateur division King of the Bay 2006 in San Francisco, California. These accomplishments made him enter PKRA 2007 World Tour. He rides harder, longer, and is more determined than any other rider. On top of that he's the nicest kid you could hope to meet, yes Sir's & yes Maam's. He has all the makings of a champion, and will soon be the best in the world.

"This year has been great, it's amazing. Going to different countries, seeing different cultures and learning different languages, it is a great learning experience. It's awesome, I love it, it's what I live for!!!"  
Rocky says that new 08 CrazyFly kiteboards are awesome!! ... "I rode the new CrazyFly boards recently and man those boards look killer, especially Limited Edition 130 x 40. LE board is light and has a great pop. It is easy to land, fast and makes a lot of fun through chop. Trust me, it is the best board I have ever ridden!"

# ROCKY CHATWELL LIMITED EDITION

*Special Edition*

125 x 39   125 x 41   130 x 40

LEVEL OF RIDING:

BEGINNER - ADVANCED - EXPERT

RIDING STYLE:

FREESTYLE - FREERIDE

FLEX:

SOFT - MEDIUM - STIFF

Is the top of our line in every aspect of it. Every single step from the selection of the finest material through precise development and design in cooperation with Rocky Chatwell to the last screw on the board is done with perfectionism and the best effort from everyone involved. This free style competition board is selected for pro riders and highly experienced riders and it is demanding advanced skills.

New 2008 Rocky Chatwell Limited edition is produced in additional size 130x40 due to the high demand of riders for this high quality board. Wood Tech Core II loaded with layers of carbon makes this board very stiff. Improved rocker with flatter center makes the board faster than LE 07. Brand new tail outline allows the rider to load up an edge when performing jumps which Rocky has been enjoying very much. This board has great pop and makes the landings so soft. CNC shaped and hand fine finished 3Dimensional ABS rails in combination with carbon layers create a torsion box, with high torsional stiffness.

As promised, we made sure we did our best with this board so it comes with Quick Fix footstraps with plastic blocks on both sides which makes it very easy to assemble and to adjust to fit you. Pro Contour C pads with right thickness, light weight, and really comfortable foam. These pads keep the right shape for long time, as well as your knees will. Rocky Chatwell board is equipped with high end shaped G10 fins. Of course they match the unique design of the board.

# Raptor

127 x 38 127 x 40 132 x 39 132 x 41 132 x 44 137 x 39 137 x 41 137 x 44

LEVEL OF RIDING: BEGINNER - ADVANCED - EXPERT	<input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
RIDING STYLE: FREESTYLE - FREERIDE	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>
FLEX: SOFT - MEDIUM - STIFF	<input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

The New Raptor Pro 2008 replaces the top selling Pro Line from 2007. It comes with a brand new outline developed by our R&D team. We improved the scoop along with the rocker line to make Raptor faster and gives it much better upwind ability. To catch your attention, our designers used a special effect changing color on the signs and the logo.

Of course we kept medium flex on the tips and focused the stiffness between the pads to give you the most comfortable ride on choppy waters. Flex tips also make the board very aggressive and dynamic in sharp carve turns. This board brings the comfort for your knees along with its dynamics to give you the smoothest and the most enjoyable ride you can ever get. Raptor is the all around board that works well in most condition from storming winds to fairly light, and choppy to flat waters.

Raptor is one of the few boards on the market build with full Nano Carbon construction. If there is carbon, you better be able to see it, and with Raptor "what you see is what you get." Our original Wood Tech Core II is the perfect balance between wood and PVC which makes the board one of the lightest in the world. CNC shaped and hand fine finished 3Dimensional ABS rails in combination with carbon layers create a torsion box, with high torsional stiffness. We are more than glad to present our new Pro Contour C footpads with a heel locker and toes grip. It comes with Quick Fix straps, handle and G10 fins which match the design of the board.

# BULLDOZER

Bulldozer

130 x 39 130 x 41 135 x 39 135 x 41

LEVEL OF RIDING:

RIDING STYLE:

FLEX:

This Full Carbon vehicle was built to bulldoze through to the next level in high performance kiteboards. This mixture between Rocky Chatwell board and Raptor is a new school free style board, with excellent pop. It is a very fast moving board, a little bit flatter and straighter outline with wider tips than Raptor. Bulldozer is a stiff board for advanced riders with aggressive style, but the board is not as aggressive in turns as Raptor.

We used full Wood Core and Aerospace High Modulus Carbon, which make the board stiff, fast, and very poppy. CNC shaped and hand fine finished 3Dimensional ABS rails in combination with carbon layers create a torsion box, with high torsional stiffness. Bulldozer is also suitable for heavier riders who enjoy the right stiffness under their feet. The position of inserts offers a standard stance, but also the new cool wide stance which is becoming popular, and gives the rider better balance and stability. It comes with Pro Contour footpads, Quick Fix straps, handle, and G10 fins which match the design of the board to bring you the best accessories with a cool look.

# CRUISER

135 x 46    145 x 44    145 x 48    154 x 39

LEVEL OF RIDING:

BEGINNER - ADVANCED - EXPERT

RIDING STYLE:

FREESTYLE - FREERIDE

FLEX:

SOFT - MEDIUM - STIFF

Cruiser Pro is a light wind machine. This new version is a very speedy board and offers a lot of fun even during low wind riding. Our precisely developed construction gives this board easy early planning ability even in very light winds which is very enjoyable. Medium flex of this board suits intermediate riders as well as more experienced riders. It rides comfortably in choppy waters, has flat rocker and narrower tips which makes it a great light wind board. Its upwind ability is superior which is especially important with light wind boards.

Wood Tech Core II and Nano Carbon technologies make the board very light considering its size. CNC shaped and hand fine finished 3Dimensional ABS rails are of course a part of Cruiser Pro. This year we offer three different sizes 135x46, 145x44, and 145x48. We choose smaller G10 fins for less drag. It comes with Pro Contour footpads, Quick Fix Straps, G10 fins, and a handle. We build Cruiser Pro with the high quality materials available, so you can really rock even in low winds.

This Board is also available in 4-Axis glass construction with Litech Core and 154x39 size. We called it simply Cruiser.

*Watersports*

# GIRLS

127 x 38 132 x 39 135 x 41

Board designed and developed specially for girl's demands. We created a slightly softer board for comfortable riding and smooth carving. Girls is free style and free ride board with great pop and easy early planning. Unique design of this board will please girl's eyes.

Full Wood Core and 4-Axis glass construction bring the weight down and the quality up high. CNC shaped and hand fine finished 3Dimensional ABS rails are a part of our boards for girls.

# IT'S A FAMILY BUSINESS

# ALLROUND

Allround

138 x 40    145 x 41    145 x 48    bottom

138 x 40    145 x 41    145 x 48    bottom

Allround is one of the most popular boards in our line. This board was designed to meet its high requirements such as flex, pop, speed, weight, and up wind ability. We kept the quality high, and the price nice. Our time proven Step Cap technology used in production of Allround boards enables the 3Dimensional hand finished ABS side wall edge to be very thin which improves the up wind ability. Allround fulfils the needs of advanced riders, as well as beginners especially the 145x48 is the best board for the first steps on water.

LEVEL OF RIDING:

BEGINNER - ADVANCED - EXPERT

RIDING STYLE:

FREESTYLE - FREERIDE

FLEX:

SOFT - MEDIUM - STIFF

# SKIM

135 x 48

# SKIM

**Skim** – is the real deal in this category of boards. The shape is wave orientated with a cut out fish tail and pointy nose. It is simple to ride and flexes nicely which soaks up the chop with ease. Skim can be used with two or three symmetric straps or strapless. It comes with self glue EVA Pro footpads and three small G10 fins.

Wood Tech Core II, 4-Axis glass, and ABS side walls maintain our high standard of manufacturing.

# MUTANT

**Mutant** – is a fun toy for big boys to ride in waves or light wind conditions. Mutant has comfortable medium flex, speedy rocker, and carves nicely. Mutant comes with six G10 fins and 3 symmetric footstraps.

This beauty is Full Wood Core constructed along with 4-Axis glass and ABS side walls.

# MUTANT

140 x 44

# WAVE

**Wave** – The vast power of ocean is waiting to be challenged. Ocean looks so beautiful with all existing shades of blue. It's moving blocks of water rocking on the beach create an unforgettable sound which rings in our ears asking for an answer. Foam so white and creamy with a crystal clear Ocean spray shows the beauty to attract us, and can not be found anywhere else. People love the Ocean and had always been curious about it's behavior. We give you the option to experience the very best of Ocean's beauty. With our Wave board everyone can become part of one of the most powerful element on the earth.

CrazyFly wave board is constructed with Multiaxial glass epoxy, has high density EPS core and real surf rails tucked under edge. Unique way of production creates one of the lightest and one of the most durable products on the market. Concave bottom with a fast scoop rocker line enables the rider to gain speed quickly, and to keep the right control over the board we equipped this board with three minituttle carbon fins. Our wave board is quick and aggressive in turns and is suitable to be powered in the hardest conditions as well as for fun easy going ride in smaller waves. It comes with two EVApro footpads with a heel step and two symmetrical adjustable footstraps which can be removed from the board to bring the option of unstrapped riding.
